WORK EXPERIENCE

teacher assistant
Syrian Private University
10/2019– Present *Faculty of informatics and communications and computer science*

Achievements/Tasks
- Programming: (C++).
- Databases.
- Algorithms and data structures.

Tishreen University
10/2011 – 2019 *Informatics Engineering, Faculty of Sciences, and the technical computer institute*

Achievements/Tasks
- Programming: (C++, Java, OOP in C++, SQL).
- Artificial Intelligent.(Matlab)
- Algorithms and data structures.

software engineer
Tishreen University
10/2012 – Present
Achievements/Tasks
- analyze system, build and publish application, design reports, develop and maintain system, employees training.

EDUCATION

2014 – 2018
Master in Software Engineering and Information Systems
Tishreen University
- Thesis Title: Ontology semantic based web service composition. Developed in Java.

2006 – 2011
Informatics Engineering - Software and Information Systems
Tishreen University
- graduation project: Native XML Database (sedna). Developed in Java

PERSONAL PROJECTS
Students Affair and Examinations Management System
(02/2014 – Present)
- I am working as a developer and reports designer in team at the. The system manages the data of 20 collages and 10 institutes and serves more than 60 thousand students. The system was built using forms & reports builder 10g, database Oracle RAC 12c and publishing via web using application server 10g.

Library Management System
(05/2013 – 12/2013)
- The system manages the Central Library of Tishreen University. It manages information about 40000 books and serves more than 50 thousand users (employees and students). The system was built using forms & reports builder 10g, database Oracle RAC 12c and publishing it using application server 10g.

Science Search Project (11/2012 – 04/2013)
- It was a system to manage the science search in Tishreen University. This system helps master students and PhD students by presenting summary about all thesis in each department, special or supervisor. It presents all statistical reports for the supervisors and university. The system was built using ASP.net developing environment and SQL Server 2008 Database Provider.

ACHIEVEMENTS
Al-Basil Certificate (2008 – 2009)

SKILLS
system analysis - Algorithms - Complexity Analysis- data structures - teamwork - Complexity Analysis - Oracle - Java - Oracle developer 10g - C# - MySQL- SQL - Design patterns - PL- SQL - XML - Native XML Database (sedna) Asp.net MatLab- Pascal - HTML5 - CSS3 - JavaScript communication - self_motivation
